

SYSTEMS | DATA | PRODUCTION | DELIVERY
Over Two Million Orders Processed

► **SYSTEMS**

Connect to most major production platforms, data sources, images, taxes, and fulfillment groups throughout the country and around the world.

► **DATA**

Connect to data for hundreds of counties including taxes, images, property records, judgments, and more.

► **PRODUCTION**

Connect your internal production groups with outsourced and backup suppliers anywhere in the world.

► **DELIVERY**

Connect to virtually any production system, vendor management system, and customer platform with completed products, xml, uploaded images and documents based on your customer's requirements.

Connects *focus*

A SINGLE SYSTEM THAT MONITORS ALL OF YOUR TITLE PRODUCTION WITH AUTOMATED QUEUING, WORKFLOW MANAGEMENT, AND REAL TIME REPORTING.

Imagine a virtual examination platform that provides instant and real time access to any order, and all of its supporting information regardless of the county, property type, production system, customer, or status of the order.

Real Time Title Production Management

Capitalizing on our industry leading automation experience, NextAce Connects™ provides a single interface that manages orders across your entire enterprise and footprint.

It brings together all of your orders regardless of the production system, order type, geography, data source, abstractor, tax or plant provider. We've added abstractor upload capabilities to the hundreds of automated title plants we already access providing a truly national footprint. In addition, the system is vastly expanded and now provides the ability to easily augment any data or systems we touch with additional information required to complete the examination.

Add to that our queuing system, which automatically queues the next order based on type, priority, order aging, and customer requirements to route orders to the best resource whether they be local or anywhere else in the world.

We're already integrated with nearly every major production system and vendor management platform so that your results are quickly and painlessly uploaded wherever they need to go.

And, our latest innovation, called Visibility, provides a real time view of current and historic productivity, quality metrics, resource availability, rules and guidelines, and order volume — *ensuring you're never in the dark.*

CONNECTING ALL THE PIECES

NextAce Connects is a single interface that ties all of your title production platforms and systems together. You can manage nearly every type of order across a wide geography including multiple data providers, tax resources, image suppliers, abstractor networks, production systems, fulfillment centers (including offshore), and delivery platforms and methods. From a real time view, you can isolate and correct problems, redirect orders, and have complete control of your production process. NextAce Connects works for everything from a single operation in one county to an entire enterprise with hundreds of locations.
